

Compass™ Benchmark Survey

Compare your P2P operations to top performers globally

We've all heard the old saying, "what gets measured gets done." That certainly applies to the procure-to-pay function. If you want to continuously improve, you need to select the right metrics and benchmark your performance at regular intervals. By doing so, you can benefit from best practices and the experiences of your peers, monitor your progress and make course corrections to help you stay on track.

To support continuous improvement initiatives, apexanalytix offers a complimentary benchmark survey that draws accounts payable, procurement and shared services organizations from around the globe. Companies use the survey to identify emerging best practices and to quantify how their performance compares to those who are best in class. Many of the participants rank among the best-managed organizations in the world and are early adopters of financial best practices.

A COMPREHENSIVE REVIEW

Participating in the apexanalytix Compass Benchmark Survey can provide a holistic look at how your operations stack up against those of other participating organizations. Our P2P survey takes a deep dive into processes, technologies and specific performance metrics.

TRENDS TRACKING

The Compass Benchmark Survey began more than a decade ago, allowing us to compare composite data over time. We track changes, identify emerging trends, monitor adoption rates and share the information with participants to guide decision making and future investments.

PEERS-ONLY COMPARISONS

To make certain your performance is compared to that of other similar organizations, the Compass Benchmark Survey is offered only to companies that meet certain revenue and disbursement requirements. Check with your apexanalytix representative to see if your team qualifies for this free opportunity.

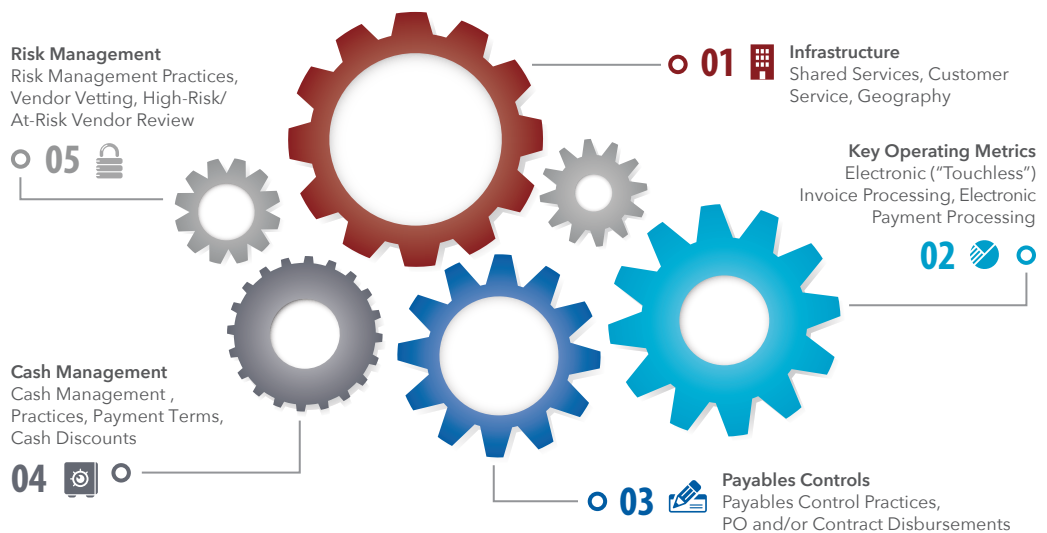

PERSONALIZED REPORTS

To get the most out of your benchmarking experience, we provide a complimentary report tailored just for you, with personalized recommendations on how to take your operations to the next level. We even offer a free consultation with an apexanalytix benchmarking expert to help you interpret the findings and plan your next steps.

BEST PRACTICE AREAS MEASURED

The Compass Benchmark Survey measures five areas.

Are you interested in participating? Visit the apexanalytix website at www.apexanalytix.com/resources/benchmarking-survey to see if you qualify to participate and receive a free customized benchmarking survey report.
