

Charlie Clark EVP & GM, CyberPro apexanalytix

Ross Garrigan Marketing Director, CyberPro apexanalytix

apexanalytix's cyber unit is a London-based "Continuous Supplier Cyber Threat and Exposure Management Capability".

The team contains a mix of ex government, military and ex procurement technology experts.

The team delivers a powerful capability at speed, scale, scope and underpinned by the highest levels of service.

Cyber risk is an issue for us all

Cyberattacks and data breaches are the top threat to supply chains.

*Business Continuity Institute research

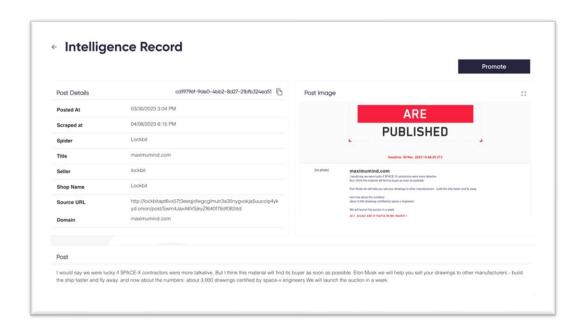

Supplier cyber risk is a business risk

 A supplier's breach cost Toyota 13,000 cars on the production line – 5% of their monthly productivity A supplier's breach allegedly exposed 'certified' designs of SpaceX rocket parts – and the criminals threated to sell them

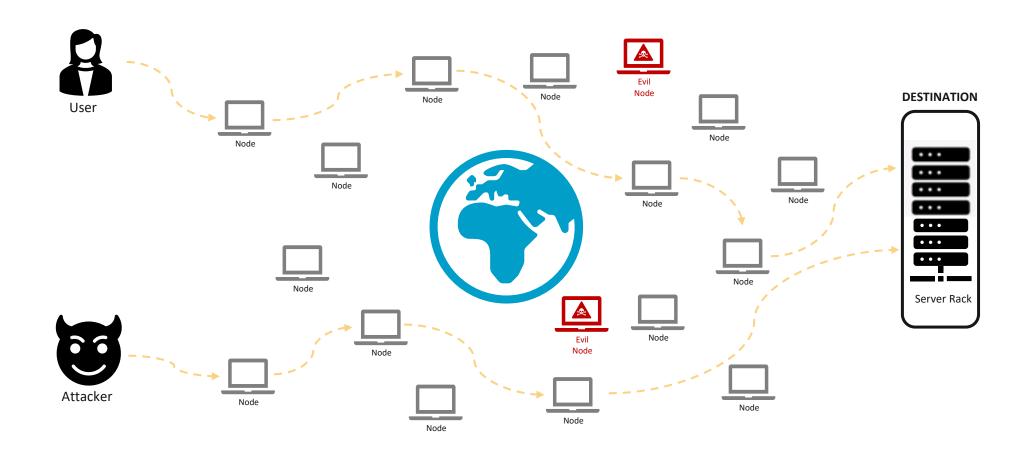

Geography of the web

The dark web is a place which offers anonymity

An anonymous part of the internet where **criminals** can sell your data safely – HIGH RISK ENVIRONMENT!

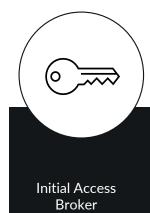

Supply chain cyber threats, methods and motivations

The Mule The Insider The Criminal / Gang The Nation State The Activist

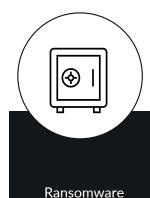

Criminal groups are highly organised

Obtain initial access to organisations.

Monetise networks by selling them to any actor

Persistence / Reconnaissance

Affiliate

Lateral movement

Privilege escalation

Ransomware deployment

Data Manager

Supply data exfiltration infrastructure and software

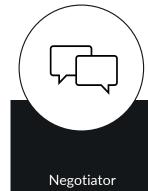

Exfiltrate data from victim organisation

Publish exfiltrated data

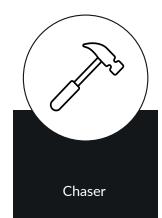

Ransomware Operator

Supply ransomware infrastructure and software

Negotiate with victim organisation

Put pressure on victim organisations by threatening with continuous attacks and leaking stolen data

Launder ransom payment

What is cyber risk?

How a supply chain attack works

Difficult

Vulnerability Intelligence

Uncover weak points within a company's digital security systems that could impact your supplier ecosystem.

- Breached and exposed email addresses •
- Blacklisted email servers
- Insecure cloud storage

- Website security errors
- Open/Closed data ports
- Domain reputation and infringements

Cyber Risk Scoring

Continuously monitor suppliers' cyber risk aligned to the MITRE ATT&CK framework.

- 31-point test organized into 7 categories of risk: Exposure, Connections, Privacy, HTTP(S), DNS, Blacklist, Audit, and Ports
- Scores are automatically populated based on pre-configured risk tolerance thresholds and can be easily updated to company requirements.

Cyber Threat Intelligence

Get ahead of cyber incidents with real-time updates on active data breaches affecting your suppliers.

- Dark web scanning and threat monitoring for an entire supplier ecosystem
- Risk-adjusted alert system that notifies your team when it matters most

Use Cases

Casino

Breached Credentials - Ransom Sequence

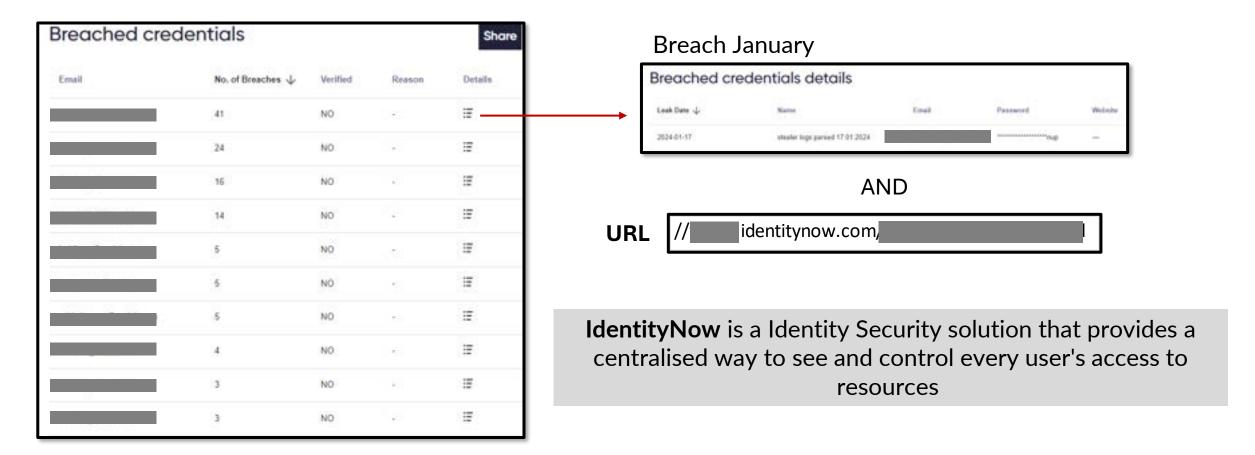

SUPPLIER 1 provides HR resources, guidance, and support As a leading global we bring together personalized program solutions, expansive global reach, innovative technology, and an unmatched supply chain to transform businesses of any size and empower talent moving to their next opportunity.

Stealer Log - Business Email Compromise Sequence

Stealer Log is a collection of data that is extracted from a victims device – they can include key strokes, passwords, credentials etc... and are valuable to criminals.

Supplier 2 is an American multinational data analytics and risk assessment firm

Awareness - Use Case

How procurement teams should also aware of the environment they work in.

Don't drop your guard.

Not just a computer connection.
