

Here's why apexanalytix matters

TO THE MARKET

apexanalytix has very deep SIM capabilities, including the largest number of third-party integrations for data verification. These support broader SXM capabilities and the company is continuously enhancing capabilities, especially in ESG and risk (acquisitions and partnerships)

TO CUSTOMERS

apexanalytix provides a broad range of features to effectively and efficiently manage suppliers (MDM and lifecycle) by leveraging its network and customer-specific requirements allowing customers to improve compliance/reduce risks and unlock new value through SCF

TO BUYERS

apexanalytix's solution is a way to quickly and efficiently create golden records by leveraging the existing high-quality (from a data perspective) network and continuously monitor and enhance critical supplier-related information and management processes, including ESG management considering several new capabilities (via acquisitions and new partnerships) in capabilities for ESG/risk management

MODULE **SXM risk enhanced**

LEGEND □ NO DATA ▬ BELOW BENCHMARK ▬ AT BENCHMARK ▬ ABOVE BENCHMARK 🏆 TOP

The benchmark is based on the average performance of 13 vendors considered in this category.

Functionality scores

MARKET FIT ALL

Enabling Services and Platform Technologies

Analytics
Extent of platform-level capability to serve as a foundation for analytics, natively or through integrations ▬

Supplier Portal
Extent of platform-level capability to support a basic level of supplier interaction ▬ 🏆

Services
Extent of a vendor's foundational implementation and integration services (i.e., partner network/MSP, onboarding and training and maintenance) ▬

SXM

SIM
Extent of platform-level capability to support supplier information management ▬ 🏆

Supplier Risk Management
Extent of platform-level capability to address risk management, including modeling, monitoring, mitigation planning and regulatory compliance ▬

Modern SXM Platform
Extent of advanced, platform-level Sxm capabilities (i.e., supplier meeting management, data gathering and supplier network support) ▬ 🏆

Risk Management

Supplier Risk
Extent of platform-level Supplier Risk Management capabilities ▬

Supply Chain Risk
Extent of platform-level Supply Chain Risk Management capabilities ▬

POSITIVE CUSTOMER FEEDBACK

- knowledge and easy to work with
- Apex Analytix met their commitment and their Supplier Mgmt Portal continues to provide value year after year.
- Thought partners ... Apex Analytix takes the time to understand our business needs and supporting technical applications to ensure solutions are well thought-out and deployed effectively.
- Willingness to jump in with solutions. Elite conferences provide countless opportunities to discuss solutions with others who are using the same product. They are constantly improving their product.

STRENGTHS

- A growing ecosystem of partners and third-party data sources providers to cover historical gaps, e.g. supply chain mapping.
- Designed to integrate with any client's systems and to be agnostic of the ERP/P2P; many integration points exist with many other procurement solutions.
- Exhaustive SIM capabilities (data enrichment/validation) that, when added to a comprehensive risk model, enable customers to assess and measure risk in all its dimensions.
